IBM WATSON IOT & DEVICE CREATION

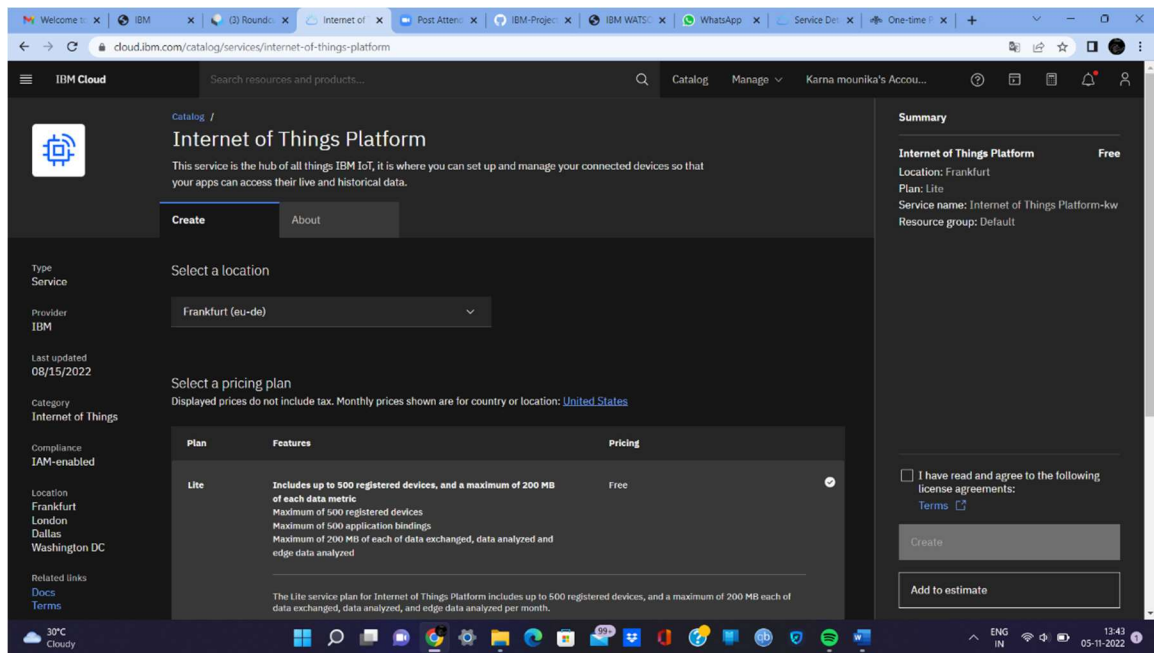

STEP 1: LOGIN TO IBM CLOUD ACCOUNT

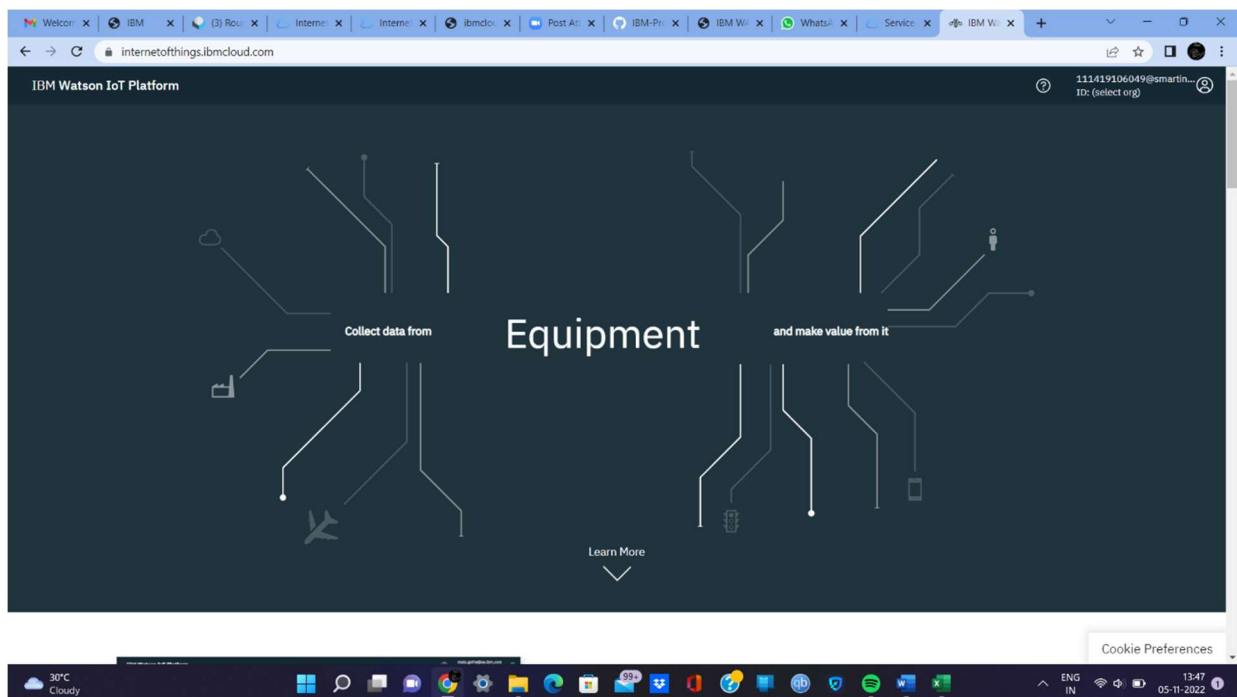

STEP 2: CLICK ON CATALOG

STEP 3: SEARCH FOR INTERNET OF THINGS PLATFORM

STEP 4: CREATE YOUR INDIVIDUAL ACCOUNTS AND YOUR DEVICES

STEP 5:

TYPE THE DEVICE NAME AND CREATE THE DEVICE CREDENTIALS

The screenshot shows the IBM Watson IoT Platform interface. The browser address bar displays the URL: `qa3k3u.internetofthings.ibmcloud.com/dashboard/devices/drilldown/iotsensors:111419106049?returnTo=/devices/browse`. The page title is "Device Drilldown - 111419106049".

On the left, a sidebar contains a menu with the following items: "Device Credentials" (selected), "Connection Information", "Recent Events", "State", "Device Information", "Metadata", "Diagnostics", "Connection Logs", and "Device Actions".

The main content area is titled "Device Credentials" and includes the following text: "You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details."

Below this text is a table with the following data:

Organization ID	qa3k3u
Device Type	iotsensors
Device ID	111419106049
Authentication Method	use-token-auth
Authentication Token	KrU+CM1Exij-6cggf6

Below the table, a warning icon is followed by the text: "Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token." Below this is a link: "Find out how to add these credentials to your device".

The bottom of the screen shows a Windows taskbar with various application icons, a system clock showing 13:55 on 05-11-2022, and a weather widget showing 30°C Cloudy.
